

CILT International Certificate in Logistics and Transport

Published by: The Chartered Institute of Logistics and Transport in the UK

Introduction

The CILT International Certificate in Logistics and Transport is a free-standing qualification, designed to provide a sound foundation for a career within the transport and supply chain fields and should provide potential supervisors and first-line managers with a complete set of management skills.

The CILT International Certificate follows on from the general knowledge gained in the CILT International Introductory Certificate and provides more in-depth information on the core business subjects and specialist areas.

The modules offered as part of this qualification can also be offered as stand-alone units, giving both students and employers maximum flexibility. This route may specifically appeal to employers who wish to target a very specific topic area (e.g. Port Logistics, Warehousing) for development as an in-house course, but then with the option for employees to move forward at a later date to 'top up' to certificate level. Note that any certification awarded on a modular basis will clearly state that the award only relates to the specific module and not to the whole qualification.

To achieve the CILT International Certificate, all candidates must study and pass the two mandatory units and one optional unit.

UNIT REFERENCE	TITLE	STATUS
CERT-M1 CERT-M2	Business Theory Business Application	Mandatory Mandatory
And choose one of the following:		
CERT-01	Warehousing	Option
